

*Blog post: Keep your sofa sparkling this Christmas, 18 December 2014*

---

### ***Our Linen Cotton, Cotton, Striped Linen***

Instructions: These fabrics need a tender approach when being cleaned. Although very reliable and durable, our Linen Cotton, Cotton and Striped Linen fabrics tend to be quite sensitive to water. That's why we'd recommend dry-cleaning your sofa in this case. The same goes for cushion covers.

### ***Our House Linen, Textured Linen, Matt Velvet, Crushed Velvet, Textured Chenille, Wool***

**Tools:** Warm water, white clean cloth, mild detergent or neat white vinegar, hairdryer

**Instructions:** Most of these fabrics are durable and easy to clean. When cleaning your sofa, you should use a white cloth with a small amount of warm water – after a few gentle circular motions, all the stains should come right off. If they've been there for some time, we advise using a mild detergent or a dash of white vinegar as well. It's important to get the upholstery dry as quickly as possible after cleaning the stains – a hairdryer will help!

With our cushions, you can take off their removable covers and quite simply, pop them into the washing machine on a cool wash and hang them out to dry.

### ***House Leather***

**Tools:** Warm water, clean cloth

**Instructions:** When it comes to a hard-wearing sofa, there's hardly a better choice than our House Leather which can be easily cleaned with a damp cloth. Any spillages and stains shouldn't soak up through the fabric, so you won't need detergent – of course, the sooner you clean it, the better.
